

4. List the files in the lab1 directory. Run the HelloWorld class by issuing the “java HelloWorld” command in the lab directory.

```
ozgur@ubuntu: ~/ceng1004/ozgur/lab/lab1
ozgur@ubuntu:~/ceng1004/ozgur/lab/lab1$ ls
HelloWorld.class HelloWorld.java
ozgur@ubuntu:~/ceng1004/ozgur/lab/lab1$ java HelloWorld
Hello World
ozgur@ubuntu:~/ceng1004/ozgur/lab/lab1$
```

Exercise 2: Write a Class Which Prints Your Name

1. Create a file named Me.java
2. Implement the main method of the Me class to print your name. Don't forget to name your class as "Me"
3. Compile and run Me class

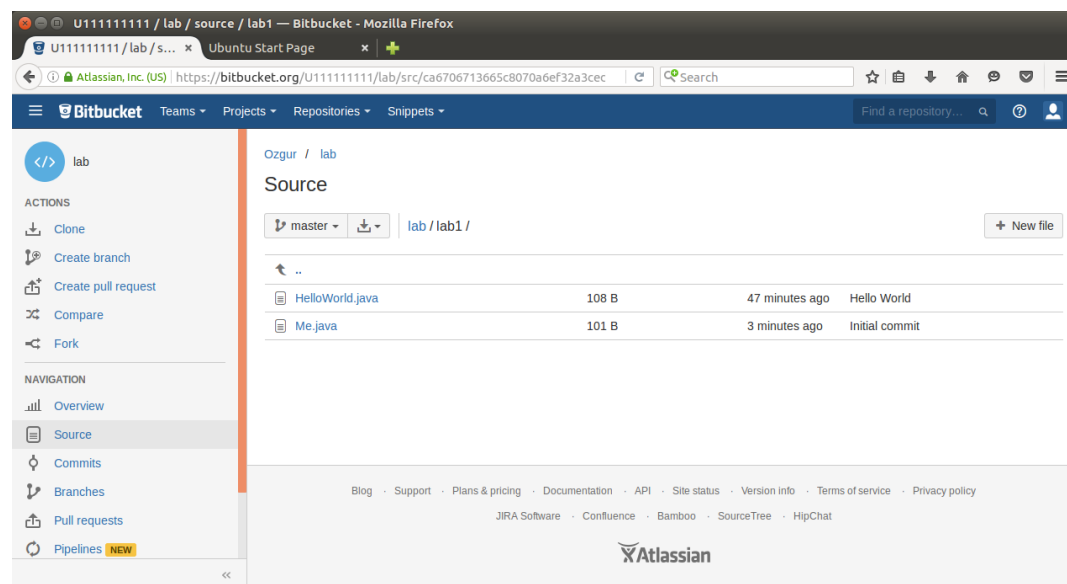

Exercise 3: Committing your source back to Bitbucket

1. Execute the following commands in the given order but replace the email address and username with the email address and username you used during your Bitbucket account creation

```
git add Me.java
git config --global user.email "email address"
git config --global user.name "username"
git commit -m "Initial commit"
git push -u origin master
```

<Enter your bitbucket password>

2. Check your repository using the Bitbucket website, it may take a minute.

NOTE: Your lab will **not be graded** if

- Your account name does not have the format described in lab1.pdf
- Your repository name is not lab
- Your files have compilation errors
- You have to commit sources until the last week of courses
- You haven't completed the steps described in the exercises
- Your added/modified files are not submitted to Bitbucket
 - You have to add commit and push files as described in lab1.pdf
